

Dicamba Limitation Language

- In combination with the 110 foot in-field wind-directional spray drift buffer, a 57 foot omnidirectional infield buffer is required to protect federally listed threatened and endangered species. Non-sensitive areas, defined below, may be included as part of the buffer.

Non-sensitive areas:

The following areas may be included in the buffer distance calculation when directly adjacent to the treated field edges:

1. *Roads, paved or gravel surfaces, mowed and/or managed areas adjacent to field such as rights of way.*
2. *Planted agricultural fields containing: corn, cotton, and soybeans.*
3. *Areas covered by the footprint of a building, silo, or other man made structure with walls and or roof.*

Dicamba Pesticide Use Limitation Areas - Draft 11-6-2018
